

Hydroliq CAR

Vehicle disinfection

Water based surface disinfection

- ~ virucidal, bactericidal, fungicidal
- ~ Dermatest "Excellent"
- ~ Swiss BAG / BAUA-listed
- ~ free of ethanol
- ~ without caustic residues
- ~ neutralization of all bacterial odors
- ~ no requirement of any hazard warnings

Product Description

Hydroliq CAR is an electrochemically modified water. Our manufacturing process creates a surface disinfection solution with the ability to eliminate 99.99% of all bacteria, viruses, germs, spores and fungi.

The chlorine alkali electrolysis process produces a disinfectant solution that is pH-neutral and at the same time very stable (guaranteed 12 months after opening).

Unique Hygiene Technology

In contrast to conventional room or surface disinfectants, Hydroliq CAR does not leave any caustic residues and therefore does not damage any materials during disinfection. The treated surfaces and rooms can be used by people immediately after or even during disinfection.

Since no alcohol is used and due to the good skin tolerance the user's skin does not dry out, which prevents germs from penetrating into cracked skin areas.

Hydroliq CAR provides a large spectrum of efficacy and deals with the majority of all germs that are adhering on surfaces:

- ~ **Virucidal**
HBV, HCV, HIV, influenza, Coronaviridae
- ~ **Bactericidal**
Staphylococcus aureus, Enterococcus hirae, Pseudomonas aeruginosa
- ~ **Fungicidal**
Candida albicans, Aspergillus brasiliensis

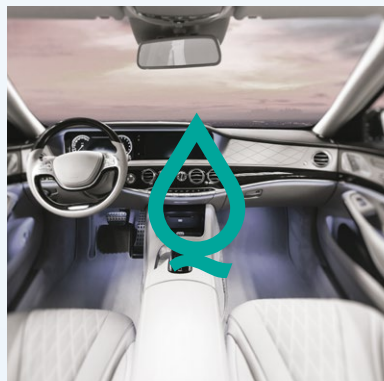

Areas of Application

Hydroliq CAR is used in all hygiene-relevant areas:

- ~ ambulance cars
- ~ taxis
- ~ limousine services
- ~ car sharing
- ~ car rental
- ~ public transport
- ~ industry and commerce

Hydroliq CAR

Vehicle disinfection

Advice of Application

Ready-to-use mixture for interior and surface disinfection (non-porous surfaces) in the private sector, in public healthcare, etc. The surfaces must be cleaned before disinfection. Use a sufficient amount so that the treated surfaces remain covered for the entire duration of exposure. For the professional and personal use.

Area of application	Dosage	Contact time
Virus inactivation (HBV, HCV, HIV, Influenza, coronaviridae)	undiluted	2 min.
Bacteria inactivation (Staphylococcus aureus, Enterococcus hirae, Pseudomonas aeruginosa)	undiluted	1 min.
Fungi inactivation (Candida albicans, Aspergillus brasiliensis)	undiluted	1 min.

Certification

Hydroliq CAR has been dermatologically tested and found to be „EXCELLENT“ by Dermatest.

Hydroliq CAR is Halal certified.

Packing Unit

Size	Item No.	Content
Hydroliq CAR 500ml	HydroCar03005	20 pcs./ box

Composition

Active chlorine, released from hypochlorous acid

Physical and Chemical Data

The product is not flammable.

Indicator according to International Directives

The expiration date of this product is printed on the label. Do not use the product after this date!

Use biocides carefully. Always read the label and product information before use. Safety Datasheet will be provided upon request.

BAUA: N-96246

BAG: CHZN6380

Storage

Keep container tightly closed in a cool, dry, well-ventilated place. Protect from heat. Protect from light.

Durability

The following durability data should be observed when using Hydroliq CAR:

from date of manufacture (expiration date)	24 months
in open condition, but firmly resealed containers or in use with dosing pump	12 months
